## User Manual

**Basic Solution  
for you**

Manufactured under the license from Hyundai Corporation, Seoul, Korea

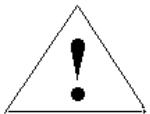

# Welcome!

PLEASE READ THIS INFORMATION BEFORE USING THE PHONE TO MAKE A BETTER USE OF YOUR PHONE. WE ARE NOT RESPONSIBLE FOR ANY DAMAGE DUE TO YOUR MISUNDERSTANDING OF THIS INFORMATION AND MISACTTING.

We are endeavoring to improve our products and services and we reserve all the rights to revise and change the description of this product and its software as well as this user's manual without obligation to notify any person of such revisions and changes.

This user's manual is for your better use of this phone not an approval of any accessories. All the pictures in this manual are for reference only. There may be slight difference between the appearance of phone and keys and contents of display used in this manual and those of your phone. Please refer to your phone for actuality. Some features introduced in this manual are network or subscription-dependent features. Please contact your service provider.

## Safety Information

Read this information before using your mobile device otherwise may result in personal injury or your device not complying with local laws.

## **PIN Code:**

Please don't turn on the PIN code function when use the two-card-standby, and notice the warning of the PIN degree when input the PIN code in other surroundings.

## **Battery**

If a conductive material such touches the exposed terminal, short circuit may occur resulting in property damage, bodily injury or burn. To avoid risk of leaking electricity, take care when handling a charged battery particularly when placing it inside your pocket, purse or other container with metal objects.

## **Keep your mobile device from water**

Keep your mobile device dry.

## **Use while driving**

Always obey the laws and regulations on the use of mobile devices in the area where you drive. Give full attention to driving and the road; use hand-free operation or earpiece if a call is needed.

## **Aircraft**

Mobile device may cause harmful interference so turn off your mobile device before boarding an airplane.

## **Blasting areas**

Always obey the related limits and regulations and do not use your mobile device in blasting areas. Turn off your mobile device in areas posted “turn off electronic devices”.

## **Potentially explosive atmospheres**

## **Medical devices**

Turn off your mobile device whenever instructed to do so by posted signs near some medical equipment. Mobile device may interfere with pacemakers, hearing aids and some other medical transplanting equipment. Do not put your mobile device near pacemakers nor carry in the breast pocket.

## **Accessories and battery**

Use the accessories, batteries and chargers approved by manufacturer. Use of batteries not approved by manufacturer may cause injury.

## **Emergency calls**

Turn on your phone and keep it in service areas, dial emergency phone numbers and then press send key to make a call.

## **When losing your phone**

To avoid any economy damage, please inform the Tele-communication Company or agencies to lock your SIM card when you lost your phone.

When you inform the telecom company or agencies to lock your SIM card they need to know the IMEI No. of your phone, which you can find printed on the label on the back of your phone when taking off the battery. Please backup this number for future need

For safety consideration, you can make preventative measures such as set PIN Code for your SIM card to prevent other persons using your SIM card without your permission.

## **Keep away from children**

Keep the phone, battery and charger away from children to avoid any personal injury.

## 2. Use and Care

To care for this mobile device, keep it away from:

### **Any kind of fluid**

Keep the device away from water, rain, humidity, sweat or other moisture.

### **Extreme heat or cold**

Avoid the temperature below -10 /14 or above 45 /13 .

### **Microwave**

Don't try to dry your phone in a microwave oven.

### **Dust and dirt**

Don't expose your phone to dust, dirt, sand, food or other inappropriate materials.

### **Cleaning solutions**

Use only a dry soft cloth to clean your phone. Don't use alcohol or other cleaning solutions.

# Essential!

## Install the SIM card

Keep your SIM cards away from the children.

Please consult your SIM card franchiser about the services and usage. SIM franchiser can be the service provider, network provider or other franchisers.

Please turn off your mobile device and disconnect it with charger before removing the battery.

Please don't turn on the PIN code function when use the two-card-standby, and notice the warning of the PIN degree when input the PIN code in other surroundings.

Note: turn off your mobile device and disconnect it with charger or any other device before removing battery door. Place the door on the phone before store and use your mobile phone.

Remove the battery door:

Press and jog the battery door let it glide to the top of the phone, then get the battery door off.

Insert the SIM card into the card slot:

Please insert the SIM cards with the right direction bases the chart.

## SIM card

Note: Please notice the warning of the PIN degree when input the PIN code in other surroundings.

## Battery Use and Installation / Battery tips

Battery life depends on the network, signal strength, temperature, and accessories you use.

Always use Original batteries and chargers. The warranty does not cover damage caused by non-original batteries, charger and/or accessories.

New batteries or batteries stored for a long time may take more time to charge.

When charging your battery, keep it near room temperature.

When storing your battery, keep it uncharged in a cool, dark, dry place.

Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F).

Always take your phone with you when you leave your vehicle.

It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.

Never dispose of batteries in a fire because they may explode.

## **Battery installation**

1. Remove the battery cover.
2. Aim the metal terminals of the battery at those in the battery compartment and then push down and into it.

## **Battery charging:**

New batteries are not fully charged. Open the protective cover on your phone's accessory connector port, then insert the battery charger plug into the accessory connector port on the side of your phone as shown, and plug the other end into an electrical outlet. Your phone might require several hours to charge fully. When your phone is power off, it might take a few seconds to show charging display and it shows charge complete when finished. When your phone is power on, the battery icon flickers when it starting charging and become still with full bars in battery icon when finished.

## **Turn it on/off**

Caution: On power up, the phone may prompt you to enter your SIM card PIN code to unlock the SIM card.

If your phone show “Input PUK code” that express your SIM card is locked, please contact your web service provider.

To turn on your phone, press and hold the power on/off key for two seconds. If prompted, enter your six-to-eight-digit SIM card PIN code and/or four-digit unlock code.

If you don't insert a SIM card, your phone shows “Insert SIM”. None of the functions related to SIM card can be used and you can make an emergency call only.

To turn off your phone, press and hold the power on/off key for two seconds.

## **Make a call**

1. Under the sleep mode, input the telephone number directly.
2. Press the communication key to make a call.
3. After calling, select Option-Disconnect or press the power on/off key or end key to end.

## **Answer or Reject a call**

When there is an incoming call, the phone rings and showing the number or the corresponding name.

Non any key: Press the power on/off key or right soft key to answer a call. If you don't want to answer, you can press the power on/off key or right soft key; can also tap the rejection on the screen to reject.

Any key: Press send key or left soft key to enter option and then select answer to answer a call; in this mode, method of tapping the screen to answer or reject can use.

## **Operation during a call**

Press Option to perform following operation during a call:

Mute:	Set mute on or off. When setting mute on, your voice can not be heard through the line
Disconnect:	Hang up and end this call
Main Menu:	Go to main menu

## **Password**

The password of your phone is originally set to be **0000**. You can change it whenever you like. You can also change your SIM card password or barred dial password but you need to contact your service provider to change them.

Note: for details please contact your service provider.

## **Emergency calls**

You can make emergency calls as long as your current location is network-covered which you can know by checking the signal strength bar showing on the top left corner of the screen.

Note: Emergency numbers vary by country. The emergency number(s) in your phone may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

## **Insert international access code**

When you are dialing an international call, press numeric key \* till the international call prefix "+" shows and then enter the number in the following order:

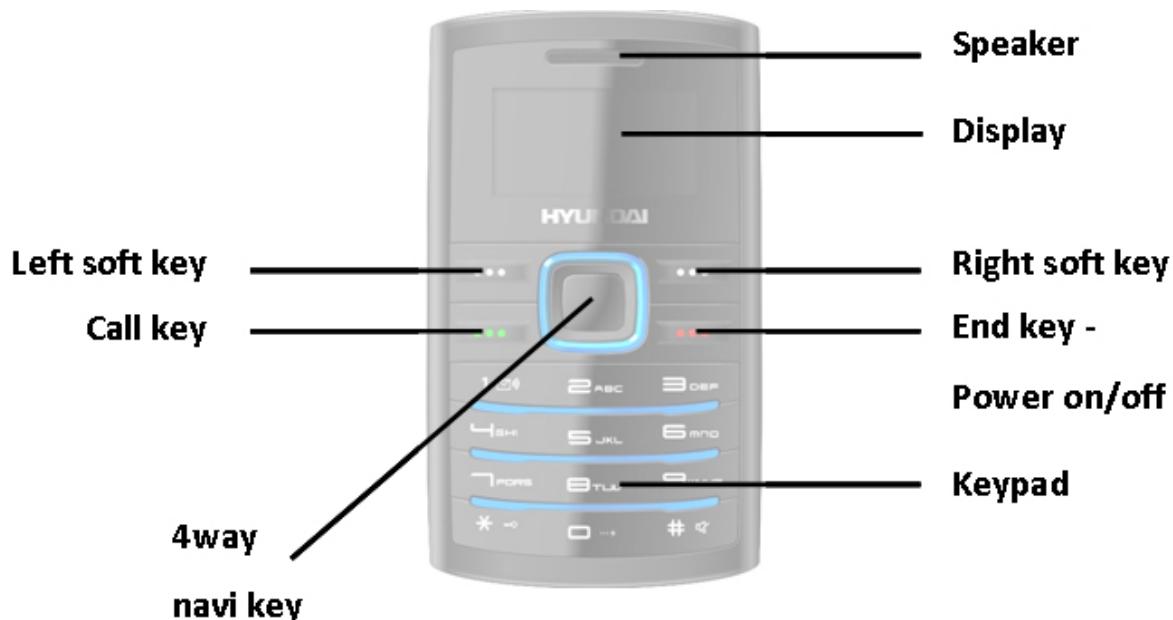

+    Country code    complete number send key

## Dial a extension or voicemail number

You need to enter P (pause) or W (wait) when dialing an extension number, press numeric key \* to switch between 'P' and 'W'. You can enter numbers as following:

District code exchange phone number P or W extension number send key.

## Introduce about the phone:

Note: All the illustrations, simulated screen and related images used in this manual are for reference only. Please refer to your handset for actuality.

# Table of contents!

This phone offers you many functions. Under the sleep mode you can press the OK key or left soft key to skim the main menu.

## **1. Message**

You can receive and send messages and also use broadcast message and voice mail box. Please contact the provider before using.

### **SMS**

You can enter the SMS menu through the message.

#### **1.1 Inbox**

The Inbox is for storing received messages.

While reading a message, you can perform following operations:

Delete:	Delete this message
Text reply:	Reply a message to the sender
Forward:	Send this message to somebody else
Edit:	Edit this message
Dial back:	Call the sender directly
Extract number:	Extract the number from this message and perform operation on it

Note: keeps flickering in idle when you inbox is full. Please delete some messages to receive new messages.

#### **1.2 Create Messages**

You can write a new text message send to others.

Select the Option after editing a text message:

Only send	Send the message
Only save	Save the message
Send and save	Save the message while sending

## 1.3 Outbox

Enter outbox to view the sent messages that you saved and you can perform following operation:

Delete:	Delete this message
Forward:	Send the received message to another person
Edit:	Edit this message
Dial back:	Call the sender directly
Extract number:	Extract the number from this message and perform operation on it

## 1.4 Draftbox

The draftbox stores any messages that you have saved.

## 1.5 Voice mail

The voice message is similar to a telephone recording service; when you have a missed call, it can be transferred to the voice mailbox, Let the caller left "soundtrack original flavor" oral message. When you have new oral message, your phone will receive message note promptly. And it offers you two profiles for voice mail.

Note: this function must be supported by network. For more information about this please contact your network provider.

## 1.6 Message setup

You can setup the message from the menu, as following:

Service center:	Allows you to store the number of your message centre, which is required when sending messages. You must obtain this number from your service provider.
-----------------	---

Protocol type:	Allows you to set the default message type to Text, Fax or Email
Validity period:	Select the period in which the service center tries to deliver the message
Status report:	Set delivery report on or off
Reply path:	Allow the recipient of your message to send you a reply via your message center, if your network supports this service. To enable or disable this option, choose On or Off.
Storage Status:	Check the capacity of messages storage

Note: you need support from the service provider to receive delivery reports.

## 1.7 Broadcast message

This network service allows you to receive text messages on various topics, such as the weather or traffic. Messages are displayed immediately as they are received, you can directly read the messages. At present, only a few networks support this feature. For further information, contact your service provider.

Topic: Allows you to indicate the channels from which you wish to receive broadcast messages.

The following options are available:

Select Topic:	Use to enable or disable channels
Add Topic:	Use to enter the ID and name for a new channel
Edit Topic:	Use to edit the ID and name of an existing channel
Delete Topic:	Use to remove a channel from the list

Service status: It allows you to turn the reception of broadcast messages on/off

## 1.8 Delete all

This menu allows you to delete all of the text messages stored in each message box. Press left soft key to select the options as follows:

## **When click on the screen and deviate**

Need to adjust, please adjust in time.

Tips: if all suggests and solutions can't solve your problem, please contact authorized after service center. Please do not disassembly or repair your phone without professional guide. Thank you!

## **Specific Absorption Rate Data**

**This model meets international guidelines for exposure to radio waves.**

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR.

The ICNIRP SAR limit for mobiles devices used by the general public is 2 W/kg.

As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

New phones must meet the international guidelines before coming into the market. The highest SAR value for this device when tested at the ear was 0.387 W/kg and the highest tested SAR value is 0.229 W/kg.

## **Information from the World Health Organization**

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of SAR Data mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a “hands-free” device to keep the mobile phone away from the head and body. Improvement of this device may cause a little change of the SAR data. However, the device is designed in accordance with the guidelines in any case.

## **Battery Tips**

The machine is provided by the reusable rechargeable battery. The new battery only can be charged two or three times full charge and discharge cycle to achieve optimum performance. Battery can be recharged many times for repeated use, but it will eventually be exhausted. When the talk and standby time is significantly shorter than usual, then need to replace a new battery. Use the battery the handset manufacturers approved only, and use the authorized charger for the battery charge only. Cut off the power supply when do not use the charger.

Do not connect a battery to a charger more than one week, the long time charge will affect battery life.

The battery storage for too long would affect the results.

And the battery will automatically discharge as long time unused.

Do not use a damaged battery or charger.

Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F).

Always take your phone with you when you leave your vehicle.

It is normal for batteries to gradually wear down and require longer charging times.

If you notice a change in your battery life, it is probably time to purchase a new battery.

Do not let the batteries short-circuit. When metal objects (such as: coins, etc.) directly connected to the battery anode and the cathode (with the metal side), will occur short-circuit accident. In the pocket or handbag carry a spare battery should be particularly careful. Short-circuit will damage the battery.

Please deal with the waste batteries according to the relevant provisions.

Never dispose of batteries in a fire because they may explode.

## **Product Maintenance**

Your phone is a product with outstanding design and superior quality, please take good care using it. You are strongly suggested to take the following advice which should help you stick to the warranty in order to extend the usage period of the product.

Keep your phone and its parts away from children.

Keep your phone dry. Keep it away from rain, damp or any kind of fluid.

Don't touch your phone with wet hands when charging or there may be bodily injury or damage to the phone.

Keep your phone away from extreme heat which can shorten your phone's life, damage the battery, twist or melt some plastic parts.

Keep your phone away from extreme cold because when the temperature grows up, water vapor accumulated from inside the phone may damage the electronic circuit.

Keep your phone away from dust and dirt.

Keep your phone away from ignited cigarettes, fire or heat source.

Don't disassemble your phone by yourself.

Don't drop, beat or shake your phone. Any rude treatment can damage the inner electronic circuit board.

Don't daub your phone because paint would jam-up the earpiece, microphone or any other removable part and disable your phone. Clean the pc camera or screen with neat, soft and dry cloth. Don't use alcohol or other cleaning solutions. If your phone, battery, charger or parts can't work, please take them to the authorized service center for help.
